Atty Dkt. No.: CORA-011
USSN: 09/648,282

In the claims:

1. (Currently Amended) A fluid delivery system for delivering at least two different fluids into separate lumens of a multi-lumen catheter, said system comprising:
a first fluid reservoir comprising a dissolution fluid chosen from an organic matter dissolution fluid and an inorganic matter dissolution fluid;
a second fluid reservoir comprising a dissolution fluid attenuating fluid; and
a metered fluid dispensing means for each of said dissolution fluid and dissolution fluid attenuating fluid, wherein said metered fluid dispensing means comprises a cartridge that includes said first and second fluid reservoirs and is configured to meter fluid from said reservoirs into a multi-lumen catheter.
2. (Original) The system according to Claim 1, wherein said system comprises a separate fluid dispensing means for each of said dissolution fluid and dissolution fluid attenuating fluid.
3. (Canceled)
4. (Original) The system according to Claim 1, wherein said system comprises a single fluid dispensing means for each of said at least two different fluids.
5. (Canceled)
6. (Previously Presented) A system for flushing an internal site with two different fluids, said system comprising:
 - (a) a multi-lumen catheter;
 - (b) a fluid delivery system comprising:
 - (i) a first fluid reservoir comprising a dissolution fluid chosen from an organic matter dissolution fluid and an inorganic matter dissolution
